

TITLE OF THE BEST PRACTICE

OASIS - Herbal and Organic Garden

OBJECTIVES OF THE PRACTICE

- To maintain genetic diversity of agricultural system and its surroundings, including the plants and wildlife habitats.
- To ensure utilization of non-toxic vegetables in hostel kitchen as well as society
- To ensure utilization of herbal plants for minor ailments of students and staff.
- To enlighten the student on the importance of agriculture, necessity of non-toxic vegetable consumption etc. in order to mould them for a healthier generation.

THE CONTEXT

Sustainability and the protection of the environment are the most challenging issues. The core necessities of life come from Mother Nature and unfortunately it is taken for granted.

The institution is very much focused on the sustainability and protection of the environment and the campus is surrounded by different kinds of trees and plants.

THE PRACTICE

Various herbal plants that can be used for minor ailments and disease prevention are planted. The NSS and SNA activities focus on ensuring cultivation of non-toxic vegetables in organic garden. In the organic garden, brinjal plant, yam plant, passion fruit plant, tomato plant, white bird eye chilly plant, pomegranate tree, gooseberry tree were planted. The campus initiated a provision for providing water for the birds & animals to cope up in the drought through the programme called "thanneerkudam".

EVIDENCE OF SUCCESS

The harvest of the vegetable garden planted was done with utmost happiness. A plenty of different kinds of nutritious vegetables from garden was harvested. The harvested vegetables were utilized for cooking in the NCN hostel kitchen. Such activities help the

students to develop environmental awareness, mastery in the field of agriculture and develop self-saving habits.

PROBLEMS ENCOUNTERED

Pest infection and destruction of plants by stray animals.

RESOURCES REQUIRED

One of the main problem is the maintenance of garden during summer season. Water scarcity is a geographical problem although there are water conservation facilities. Recycled water is used for watering the garden. Students have to find time in between their heavy academic requirements for gardening . Resources required are manpower, tools for farming, pots, soil, organic fertilizers like cow dung, neem juice etc.

PRITHVI 2022

“Saving our earth and its environment becomes highly important as it provide us food and water to sustain life. Our well-being solely depends on this planet it gives food and water to all living things so it is our responsibility to take care of it. That is why each year on April 22, more than a billion people celebrate Earth Day to protect the planet from things like pollution and deforestation. The Earth Day 2022 theme is ‘Invest in Our Planet’. Given that the time is short, the theme highlights the need for people to come together and start taking measures to protect biodiversity and the planet.” Taking as a reminder that; for the mankind , to protect and safeguard the mother earth and its species is mandatory, for making Earth a better place for the coming generations, Nehru College of Nursing had organized PRTHVI 2022 an initiate of planting an organic garden in the campus on world earth day 22nd April 2022.

The basic theory in organic gardening is that; nature knows best. organic garden nurture the ground and therefore all that springs above it through techniques or systems that are found in nature seek to live a cleaner, healthier existence & more in a earth friendly way. 1 st year BSc Nursing Students & all the faculties of NCN together worked to build up the new organic garden in the NCN campus. Such a greater initiative offers the perfect intake of fruits and vegetables for the students & it decreases the amount of toxic chemicals that intake. It also makes the students aware that the only way to honour our mother earth is by creating balance in our lives and adopting eco-friendly habits, and by that we can make this planet a much better place to live in.

THANNEERKKUDAM 2K22

Extreme heat, coupled with drier conditions can significantly alter animal's habitat. Due to the severe drought condition, most of the water bodies have become dry. The hardness of summer is affecting not only the humans but all other living creatures in the world. As human being is more intelligent & things are much easy for them to access it is their responsibility to protect the other fellow beings in the earth. Being the angels in the earth, the social conscience of our little angels have no boundaries. The NSS volunteers & College union of **NEHRU COLLEGE OF NURSING** had begun an initiative to save the birds & animals from the severe draught "THANNEERKKUDAM 2K22" on 16th MARCH 2022 with an aim to provide water for the birds & animals to cope up in the drought. **Dr KAVITHA MOLE P J** (Principal NCN) addressed the gathering & made the students aware about the necessity of such an initiative in the current status & appreciated the effort of the NSS team & college union. NSS Co coordinator Prof. **ABADUL NISTHAR** & college union chairman **MR. ANSHID RAHMAN** had done the inauguration by filling the pots with holy water of mercy. It is commendable that such initiatives are being taken by the students to spread the showers of care & concern for their fellow beings.

NATURE TO NATURE

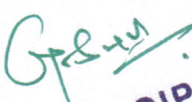

WORLD ENVIRONMENTAL DAY 2022

Sustainability and the protection of the environment are without a doubt among the most pressing issues we face in the world today. The core necessities of life all come from Mother Nature and, unfortunately, we take it for granted. World Environment Day encourages everyone from individuals to large-scale corporations to be more conscious of their impact on the environment. The theme for this year's celebration of World Environment Day is **'Only One Earth'**.

With regards to World environmental day 2022 Nehru college of nursing in association with OUSHADHI , Kuttanallur organized planting a herbal garden in the campus. The official inauguration & handing over of the saplings was done by Dr. Praseetha specialist Medical Officer, Ayushgram On 7th June 2022. Dr Kavitha mole P J Principal NCN addressed the gathering made the students aware about the importance of protecting the nature & planting trees . Mrs Zaina Elisebath expressed the token of gratitude. This kind of events makes the students aware that protecting our environment is the foundation for sustaining our planet, community and economy & as the upcoming citizens it is one of their primary responsibilities.

EXHIBITION OF HERBAL PLANTS

“Plants have been used for medicinal purposes long before prehistoric period. According to WHO, around 21,000 plant species have the potential for being used as medicine. The economic importance of medicinal plants is much more to countries such as India than to rest of the world. As our lifestyle is now getting techno-savvy, we are moving away from nature. So medicinal plants are important for people, not only as a primary source of medicines but also as phytochemical building blocks for development of new drugs “

Community health Nursing department & NSS Unit of Nehru college of nursing organized a exhibition of herbal plants at Govt Voc H S S Koonathara on 17th July 2022 with the aim of making the public aware about the relevance of using medicinal plants in their day today life. Our 4th year BSc Nursing students were the main organizers of this event. Herbs of different categories were displayed in the exhibition & the students explained about each plant & its medical use. Public from local areas & the students of that school were active part of the exhibition. Through this event we tried to spared the message to the public that herbs are natural products they are free from side effects, they are comparatively safe, eco-friendly and locally available & there is a need to promote them to save the human lives. Such interesting & novel ideas for creating public awareness to be certainly appreciated

AYUSH MISSION - COMMON MEDICINAL PLANTS & IT'S USES

Owing to fast paced world that we are living in, we are getting far from the nature. While the lifestyle that we live can have adverse effect on us, it is important to know that by introducing small changes in our daily life can go a long way in keeping us healthy and energetic. Therefore, the importance of Ayurveda holds true in today's life as it is based on the principal of bringing us close to nature and relying on its natural powers to cure us and keep us healthy without any side effects the way of understanding the basic fundamentals of Indian Ayurveda is to spend more time with nature and observe the plants and herbs. Each plant or herb has a specific quality and can be used to treat multitude of ailments and diseases. Since they are in sync with nature, they hold greater advantage over chemically treated products and synthetic medicines.

In collaboration with AYUSH MISSION in Vaniyankulam Grama Panchayath a class was conducted for 1st year BSc Nursing students and their family members regarding the common medicinal plants and its uses. Google meet platform was used. The speaker for this session was Dr. Nithin Mohan , the Nodal officer of AYUSH Mission in Vaniyankulam Grama Panchayath , Palakkad District. In this session he explained about the common herbal plants & its medicinal uses . The session was very much effective which helped the students to gain more informations regarding the medicinal plants which will really help them in day today life & also helpful for giving advices to the patients in their professional life. There was an excellent feedback & response from the students side
