NURSING FOUNDATION LAB

The Nursing foundation lab is well equipped with high quality Manikins, Equipments and instruments as recommended by Regulatory Bodies. The lab is well equipped with simulators on which students will be demonstrated the preliminary training of Patient care. In simulation, the learning is made easy by resembling clinical practices and skills as closely as possible to the real patient care and environment. This also paves a way to the students to think and act as real patient's scenario. To provide comprehensive nursing care to the patients, students are closely supervised and constantly mentored in groups by faculty. Basic nursing procedures are demonstrated by the teachers, and then students re-demonstrate on Manikins in the lab and on each other. After gaining confidence, students are permitted to carry out these procedures on patients in the clinical area under supervision of faculty. In a glimpse, the nursing foundation lab provides extensive and intensive training and learning opportunities for the students to excel in providing holistic nursing care and to become a competent professional nurses.
