## CHILD HEALTH NURSING LAB

The Child Health Nursing Department deals with the art and science of caring for newborn children and those up to the age of 18 years. The major equipments available in the lab are Baby Mannequin, CPR mannequin, Laryngoscope, Oxygen Hood, Ambu Bag, Mucus Sucker infantometer and play materials for various age groups. This lab provides strong foundations for handling the newborns and children with the help of manikins. This lab helps to develop skill in carrying out and assisting various pediatric procedures in clinical settings and community settings. Students get an idea on importance of play therapy as age appropriate play materials are neatly arranged in lab.

## COMMUNITY HEALTH NURSING LAB

The institution has a Community Health Nursing lab, with all the Equipments for education and practice. The students are given training in basic nursing procedures which are required in the community setting. Different types of AV Aids are used in Community Health Nursing Practices. This lab provide opportunity to learn about home visit using bag technique. The practices learned in community Lab help the students to provide family health care at their door step. Demonstrations done on different procedures prior to community visit. Demonstrations make the learning more realistic and authentic. The major equipments available in the lab are community health nursing bag, mucus extractor, specimen bottles, Foetoscope, Nutritional assessment cup, weighing machine and Infantometer.

## OBSTETRICAL AND GYNAECOLOGICAL LAB

The Obstetrical and Gynecological Nursing Lab provides quality teaching and offers best learning experience for learners. It provides training in Obstetrical and Gynaecological nursing with theoretical and practical components to undergraduate students and mould them with essential skills and knowledge to deliver inclusive maternal and neonatal care. The department promotes research in the prime areas of women's reproductive health. The lab provides effective and proficient amenities to the students to empower them to serve as educators, managers and researchers in the field of maternity nursing. The Central competences are inclusive nursing care to women in pregnancy and childbirth, integrated learning of theory and practice, evidence-based clinical learning, development of interactive skills and professionalism. The Lab is well equipped with Birthing Simulators, Pelvis, Fetal Skull, Various Obstetrical Instruments, different kinds of Models etc. The stages of Labour is demonstrated to the students with the help of Birth Demo model. The lab helps students to acquire knowledge and skills in rendering nursing care to normal and high risk women during antenatal, intranatal and postnatal periods in hospital and community settings

## ADVANCED NURSING LAB

The lab accommodates students by providing scheduled time for both skill practice and patient specific preparation in all the specialties. The lab contains advanced simulators and equipment pertaining to all nursing departments. The role of the teachers in the lab is to support student learning by assisting the students with skill practice and developing critical thinking. The lab facilitates the students to develop skill in advanced nursing procedures like tracheotomy care and suctioning, oral suctioning, bladder irrigation, colostomy care and irrigation, catheter care and insertion, endotracheal tube insertion, blood transfusion, IV fluid administration, wound dressing etc.

## NURSING FOUNDATION LAB

The Nursing foundation lab is well equipped with high quality Manikins, Equipments and instruments as recommended by Regulatory Bodies. The lab is well equipped with simulators on which students will be demonstrated the preliminary training of Patient care. In simulation, the learning is made easy by resembling clinical practices and skills as closely as possible to the real patient care and environment. This also paves a way to the students to think and act as real patient's scenario. To provide comprehensive nursing care to the patients, students are closely supervised and constantly mentored in groups by faculty. Basic nursing procedures are demonstrated by the teachers, and then students re-demonstrate on Manikins in the lab and on each other. After gaining confidence, students are permitted to carry out these procedures on patients in the clinical area under supervision of faculty. In a glimpse, the nursing foundation lab provides extensive and intensive training and learning opportunities for the students to excel in providing holistic nursing care and to become a competent professional nurses.

## ANATOMY MUSEUM

The excellent museum exhibits more than 200 dissected cadaveric and fetal specimens. The museum also displays sections of human body, radiographs, human skeletons and developmental anatomy models. The museum collection is presented in several sections, e.g., Head and Neck, Thorax, Abdomen and Pelvis, Limbs, Sectional anatomy, Nervous system and Embryology. New specimens and models are continuously added to the collection. Presently, genuine efforts are being made to promote the museum as a lively source of interaction for health science students and the public.

## DISSECTION LAB

The clean and brightly lit, hall ensures adequate space for more than 150 students at a time. The excellent cadaver preservation facilities include cold cabinets which can accommodate 16 cadavers. Formalin tanks for cadaver preservation and wash area is also available. Moreover, well preserved specimens of all parts of the human body are easily available to the students. The teaching-learning process is enhanced by normal X-ray, MRI, CT scan images and embryology models. The individual bones and articulated skeletons are also made accessible to the students during working hours. The dissection hall is well equipped with anthropometric instruments, X-ray view boxes and instruments essential for preparation of anatomical specimens, e.g., band saw, circular saw, brain knife etc.

## FORENSIC LAB

The Department of Forensic Medicine and Toxicology at PKDIMS provides high quality Medicolegal Education to the Graduating students training them in various fields such as Forensic Radiology, Anthropology, pathology, Histopathology, Serology and Toxicology. The Department is fully equipped with modern forensic scientific tools and Highly experienced Medico-legal experts. The Department of forensic Medicine is also integrated with a state of the art Mortuary block, highly capable of handling Medicolegal postmortem examinations. The department aims at training the graduating students to well handle medicolegal cases in their day to day routine case encounters ranging from examining victims of trauma, sexual assaults, poisonings and certifying cause of death, sickness and fitness reports, injury reports, drunkenness, potency, age and dying declaration.
