Webinar on Mental Health & Substance use challenges 2022

For many years, drug trafficking in South Asia has been the most lucrative form of business for criminals. Substance abuse refers to the harmful or hazardous use of psychoactive substances, including alcohol and illicit drugs. Substance abuse and mental health disorders such as depression and anxiety are closely linked, although one doesn't necessarily directly cause the other. Substance use challenges can impact one's life in many ways. Things like feeling like a burden, racking up legal & financial expenses, feeling like one can't stop using, or having relationship problems can all stem from substance use.

Mental health department of Nehru College of Nursing organized an international webinar in Google meet platform on Nov 5th 2022 on the topic Mental Health & Substance Abuse Challenges. KNMC Credit hours- 06(C/87188/2022/NC-CNE dated 03/11/2022).

ENFANCE EPEIGON

(International Workshop on childhood emergencies)

Pregnancy, ensuring delivery, motherhood and rearing children are some of the most beautiful phases in person's life. During all these phases, women as well as children including neonates require special attention and care. General Practitioners frequently see children with medical conditions that may evolve into an emergency not promptly attended to. The most common emergencies encountered in pediatric office practice are respiratory distress, dehydration, anaphylaxis, seizures and trauma. Acute and life-threatening conditions are not uncommon in general practice, but when they do occur, they require prompt and meticulous care as faulty treatment or delay in management, can mean the difference between survival and death.

On behalf of Children's day and New born week 2022 Child Health Nursing Department of Nehru College of Nursing organized 2 days workshop regarding Childhood emergencies, "Enfance Epigeone" on 24th and 25th November 2022 with KNMC credit hour 18 (C/89704/2022/NC-CNE date 05/11/2022)
